

Weather information

Volta a la Comunitat Valenciana Gran Premi Banc Sabadell 2017

Weather forecast for Sunday 5th February 2017

On Sunday, for the end of *La Volta*, it will be important to pay attention to the weather and its evolution. The temperature will be mild, around 14-15 degrees in the departure in Paterna and 20-21 degrees in the finish line in Valencia, but there will be clouds in the sky throughout the stage and sporadic downpours could be registered practically from the starting line to the halfway point of the stage. In the last stretch of the route, although it will continue being cloudy, the rain probability will descend.

The wind from the west will also be a factor to be taken into account. At the beginning of the race, gusts of 30 and 40 Km/h will be registered, but the wind is expected to blow stronger as the bunch approaches the finish line.
